-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 19 March 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**  
**REPEATED REJECTIONS**

1. The 35 U.S.C. 103(a) rejection of Claims 23 – 49 as being unpatentable over Lind et al (U.S. Patent Publication No. 2001/0003624) in view of Agouri et al (U.S. Patent No. 4,126,648), of record on page 2 of the previous Action, is repeated.

**ANSWERS TO APPLICANT'S ARGUMENTS**

2. Applicant's arguments regarding the 35 U.S.C. 103(a) rejection of Claims 23 - 49 as being unpatentable over Lind et al (U.S. Patent Publication No. 2001/0003624) in view of Agouri et al (U.S. Patent No. 4,126,648), of record in the previous Action, have been carefully considered but have not been found to be persuasive for the reasons stated below.

Applicant argues, on page 7 of the remarks dated March 19, 2008, that Agouri et al does not teach a multilayer film.

However, because Agouri et al is directed to a film, and because Agouri et al teach the advantages of a film comprising 60 – 90 wt% high density polyethylene and 40 – 10% low density polyethylene, it would have been obvious for one of ordinary skill in the art to have provided for a film comprising 60 – 90 wt% high density polyethylene and 40 – 10% low density polyethylene in each layer of Lind et al.

Applicant also argues, on page 8, that Lind et al discloses a film having a barrier layer, and that combination with Agouri et al renders the barrier structure unsatisfactory.

However, as stated on page 2 of the previous Action, Lind et al is not limited to a film comprising a barrier layer; Lind et al also discloses a film comprising one layer comprising a

single layer comprising an ethylene polymer (paragraph 0013) or a multilayer film comprising ethylene polymers made with a metallocene catalyst (paragraph 0013) for providing increased strength and faster bag making speeds (paragraph 0013). Alternatively, the film may also comprise a barrier layer as disclosed in paragraph 0014, but paragraph 0014 is not mentioned in, and is not relevant to, the rejection.

Applicant also argues, on page 8, that Agouri et al do not teach metallocene polyethylene.

However, on page 2 of the previous Action, because Agouri et al teach polyethylene catalyzed with metallocene, Agouri et al teach metallocene polyethylene.

Applicant also argues, on page 9, that each layer of Lind et al does not comprise HDPE and LDPE.

However, as stated on page 2 of the Office Action dated May 16, 2007, each layer of Lind et al comprises HDPE and LDPE, as stated in paragraph 0013.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marc A Patterson whose telephone number is 571-272-1497. The examiner can normally be reached on Mon - Fri 8:30 AM - 5:00 PM.
